

# Platform maintenance

Regular platform checks in your dairy shed will ensure the life of your rotary platform and protect your business from unwanted stoppages due to rotary platform failure. Also, not picking up on anything that is set up incorrectly or running as it's supposed to, can cause a lot of damage if left to run in a poor state.

	Weekly	Monthly	Six monthly	Annually
Check the following switches are still working correctly: - pressure switch - emergency stop switch				
Spray the following with WD40: - nylon wheels - pulleys on pull cords				
Check SEW platform drives for oil leaks				
Check the wear on drive wheels				
Clean under platform to stop dirt and grime building up around drives and stands				
Annual service				

If you find any issues as part of any maintenance checks or need to arrange your annual service, please get in touch with your local service agent or Donald Engineering.

Your local service agent is:

Donald Engineering Ltd  
1946 Edendale Woodlands Highway  
Edendale 9893
